

## Mobile CCTV Units

### **Why use our Mobile CCTV Unit?**

This solution fulfils many different roles all in one Mobile Unit. Fully equipped with 4 IP cameras on a telescopic mast, PA System and remote monitoring, there are many features you can take advantage of that are unique to this solution when you hire our mobile CCTV Unit.

## **Why use this Service?**

Our Mobile CCTV Surveillance units allow us to provide clients with a wide area surveillance system which can be rapidly deployed at short notice. Our Mobile CCTV Unit provides you with flexible, results driven method of monitoring various locations such as high footfall events and well-known problem areas. Delivering remote, mobile CCTV coverage and giving you a real time snapshot of the chosen areas, there are many benefits to hiring our Mobile CCTV Unit.

Typical applications would include:

- ✓ Health & safety monitoring of public events
- ✓ Car park surveillance & monitoring
- ✓ Construction site security
- ✓ Policing & crowd control
- ✓ CCTV Surveillance
- ✓ Outdoor Music Events & Festival Control Room
- ✓ Sporting Events
- ✓ Short-term Site Security
- ✓ Anti Social Behaviour
- ✓ External Electrical Supply

## **Construction Sites**

Sometimes, new construction sites do not have welfare facilities available and ready yet and often they are waiting either for a welfare unit or CCTV to be fitted. Across Ireland, one in five construction sites are targeted and vandalised meaning you don't want to operate an exposed site. Luckily, for this interim period where you are without a security presence, the Unit can be an immediate short term solution offering your site great coverage and much needed peace of mind and provides a flexible alternative to static construction site security guards. The CCTV cameras feed back to our central station where they can be monitored 24-7

## **Outdoor Events, Festivals & Markets**

Often areas with a high footfall require extra security measures and our CCTV Unit is the ideal, mobile solution. Able to be used as either a Control Room or an Incident Monitoring Unit, event organisers can use the Unit as their base or the Unit can travel to areas that aren't currently receiving CCTV coverage. Whatever you choose, the result is the ability to respond to dangerous or undesirable situations in real time

## **Anti-Social Behaviour**

Due to the mobile nature of the solution, the Unit can be dispatched at extremely short notice and therefore can act as a great system to stop anti-social behaviour in its tracks. Available to be hired as a standalone Unit or as an external Control Room, the Unit allows our central station team real time decisions that would otherwise not be possible.

## **Illegal Dumping**

Fly tipping has been on the increase in Ireland, in general, as recent figures released this year showed a 40% increase in illegal dumping compared to the same period last year. Depositing of large amounts of rubbish is usually associated with isolated rural areas. Invariably these locations are situation in some of the most beautiful, scenic and frequented areas of our country. Locations that are prone to illegal dumping are affected both on a visual and environmental level. Our mobile CCTV Units can be deployed to stop illegal dumping and help tackle the problem of fly tipping. This initiative had been highly successful so far.

## **Power**

Our units are powered with mains electricity which is backed up by a powerful hydrogen cell battery.

Unit can also be deployed on site without power as it can be run off portable Gas secured within the unit battery.

## **Rentals include the following**

- ✓ Live CCTV Monitoring in our central station via 4G
- ✓ Gas refills each week for rental exceeding one week
- ✓ Rapid response key holding service: Sharp Group upon its intrusion will dispatch one of our mobile patrol drivers to the site
- ✓ **Weekly Rental Charge €495 ex vat**
